

Abstract of the Article
“Research of Modern Trends and Determination of Methodological Foundation for Assurance of Economic Security of an Enterprise”
by O. Melnyk

The process of economic transformation in Ukraine is still in progress. Therefore the problem of economic security of all economic entities is gaining in importance.

The article defines the meaning of the words “economic security of an enterprise”.

The research that has been carried out helps:

- to determine the tasks economic security of an enterprise;
- to summarize the essence and ingredients of the functional component of economic security;
- to work out and offer a algorithm for the analysis of the level of the enterprise’s economic security;
- to determine that the level of economic safety at each enterprise depends on how much effective the owner and managers can be in the work of avoiding possible threats and eliminating negative consequences of the effect of internal and external environment.
